

Brisbane Common Law Assembly 7

March 2021

▪
New Farm Park

Meeting opened 2:12 pm

Present: List of 22 attendees and contact details taken.

Welcome by Sam Hanrahan. Sadly she's moving to Bribie Island soon and is standing down from her position as Convenor. Good news! The position is open for someone else to step to take. Please let Sam know if you're interested.

The previous minutes were lost on the upgrade of Sam's computer, but will be uploaded soon.

Minutes accepted

Ross took the stand and spoke about the practice court and how well it went and said we'll be doing another one.

Why are we here? Because we want to preserve our freedoms and the freedom of our children and future generations.

We need to create flyers that will attract attention.

Maybe we could use tv screen/monitors to show something catchy at events?
Aaron suggested that to come up with anything successful, we need to cover the 5 W principle of Who? What? Where? Why? and How?

Ross said his personal reason for being here is that he doesn't know what he doesn't know. He came along because he witnessed Sam's passion and it was contagious. (That's a great testimony right there. We should all burn with passion for truth and freedom and people will see that fire in us and want to join us. ed)
Most people have no interest in politics.

Fiona said people need the Pain Points to be triggered. Most Aussies are apathetic, but they always bite when their back pocket hurts. The concept of common law can

be confusing. If we can find their pain points and offer solutions to the pain, we can get a good response.

Memes can be clever. Through the use of humour and sarcasm we can tap into the pain points. Sam's friend is an artist who has created cartoons that Sam will make available to all of us to use.

We need to preempt points to stay ahead of things. For instance when the media says they've found a strain of covids in the sewer, we know that means a lock-down is imminent and we can be ready for it.

Aaron also reminded us of how important it is to include links in any posters or memes so people can confirm the information. Barbie mentioned that Greg had seen a social media post from someone who was angry about finding a flyer in their mailbox. Said person threatened to beat the s**t out of whoever placed it there if he finds them. Aaron reminded us that we can't be intimidated by threats of violence as those people making the threats can be charged.

How do we know what is true? How do we check it? If Facebook Factcheckers say it's false, you can be pretty sure it's true.

Why are we being censored?

Why are the governments trying to kill us? They're exempt – why?

The recovery rate of the 'virus' is 99.99%.

VAERS says the death rate from vaccine side effects is 4.1%

Daily deaths 'by covid' up until late Feb were 4.5 per day, then jumped to around 70 or more per day. The vaccines are worse than 'the virus'. Why the jabs?

Aaron said that stating numbers may not dissuade people.

Parents are lining up to vaccinate their kids. When there is confusion, they believe the media rather than any information we offer.

There have been 195 studies worldwide on the efficacy of Hydroxychloroquine. It works. People in some countries take it every Sunday.

The EU is saying the vaccine is not mandatory, but they're coming up with a lot of coercion.

When employees are told to vaccinate, they prefer to leave their job than fight, but they can sue for discrimination under Fair Work Practices.

It's an experimental vaccine, so they won't be covered by insurance if they die or are injured. That's a good pain point for a flyer. People are paying for insurance, but if they aren't covered, then they'll be wanting out.

Duress- people are getting the jab to keep their job.

Does anyone here have any relatives who have had covid? No. None have.

Recruitment

If we're printing up flyers, statistics won't work. Let's go with an insurance theme. Superannuation will also not pay out. Sam will ask her friend to make an insurance cartoon.

Qsuper put in a clause for anyone joining through a general employer saying they won't cover them for covid. Essentially they were going to screw over new members. Now many medical questions will knock you out of entitlement so they will refuse to insure you. It's in the PDS, but it 55 pages long and nobody will read it. The yellow flyers aren't attention grabbing, so we'll make some new ones.

Call to action – we all need to call our insurers and ask if we are covered if we die after getting the covid vaccine. Get it in writing. Ask people we speak to and on social media, "If you're not covered, then what are you paying for?"
Fiona has a list of questions to ask the insurers and will send it through.

Sam will create a Google docs spreadsheet that we will all have access to and we can all add the information we find.

Once people start getting injured from the vaccines a lot of them will be coming to use the common law courts.

It all takes a long time. The International Tribunal of Natural Justice (ITNJ) is also gaining popularity.

Solari.com has a disclosures report to provide to families. Eg if you get anaphylaxis what to do legally.

Have you watched the video of Catherine Austin Fitts? She explains the pandemic from an economic viewpoint and it's very interesting. (It's been removed from Youtube for telling the truth, but I had downloaded it and will give it to Sam to make available. You may also find it on other platforms. ed)

Ross asked Fiona about the three letters re: putting the govt on notice and so Fiona refreshed us on how it has all the MP's (email) addresses and how to use them.

A member stated that they are up to stage 3 of the letters and the judge is about to stamp it and that means a contract has been entered.

We all need to do this so Greg Hunt and others are now PERSONALLY liable for damages.

INSTEAD OF GETTING THE VACCINE, SEND THE LETTERS.

Doug mentioned that we should do it as a workshop so people can get it done. There is so much information out there that people are overwhelmed.

Maccas have conference rooms available for hire, with wifi.

The docs previously sent by Fiona were locked. She will unlock them and resend.

Fiona will let Sam know when she's available so we can do it Australia wide via Zoom. This could be a lead-on from the Insurance Flyer.

A member mentioned that there is a video about Bill Gates wants to create armies overseas that can be sent in to other countries.

Israel has a Green Bracelet that tracks distance from home and whether the wearer is vaccinated or not.

Tanzania, Madagascar and Ghana have told Gates and his cronies in no uncertain terms that they won't be participating in the program.

Q: What's a eugenicist? A: Bill Gates

Fiona mentioned that anyone can get a free red Australian flag from their MP. They will ask if you have a flagpole. Just say yes (or your brother in law is putting one up next weekend?) Tell them you want a red one because that's the one the WW1 vets fought for us under.

The last Friday of July is the real Australia Day. There are always 2 services – at dawn and dusk.

Miles wants to call a Citizens Initiated Referendum (CIR) but only government can call one. But they can't call one at the moment because the government is unlawful. We need to rewrite to constitution once we get rid of the treasonous government.

Santa Surfing mentioned that Trump announced a second Declaration of Independence on 4th July 2020.

If you 'google' 25 covid questions then you'll find some good questions to ask at a barbeque to make people aware.

Reminder to copyright your genes. That means they can't store, recreate or change them. The website for doing this was provided previously in minutes.

Aaron suggested that new people need a task to do to make them feel involved in the assembly.

Everyone's task is to research the Insurance payout on covid vaccine death and injuries.

Tanya suggested that we need a weekly topic for everyone to research and get involved in.

Did you know that the 3 heel pricks performed on newborns are to take a dna sample? Fiona explained the Guthrie Card – the card the blood is placed on. When they took your blood sample they took ownership of your Lifeforce. They sell your birth certificate for \$1 million or more. (See your Strawman) You can write to the hospital where you were born and ask for the card back. Tell them your DNA is copyrighted and they have no right to it.

Rile got up and spoke about being a sheriff. He's with the Logan Assembly. We need more sheriffs. The police are a business and we need more of us. There was an incident with some sheriffs recently, and we don't let that stop us. Sheriffs are the last point of justice for the police, like a game of chess.

Fiona talks to overseas people in assemblies like ours and will create a group for us on Trooth Network so we can all join in.

Meeting ended 4:05pm

Next meeting 11th April 2pm, New Farm Park unless otherwise advised.
